

March/ April Newsletter 2011

We are using the “Water” FOSS (Full Option Science System) kit. This kit introduces the students to the properties of water. We are arranging a guest speaker to talk to us about water and water conservation.

In social studies we are continuing to study maps and globes.

In math we are discussing fractions. This chapter will cover unit fractions, equivalent fractions, and mixed fractions. Our classes will be working on division facts in Muskie Math.

April 4th starts our final AR goal. This reading goal will continue until the end of the school year.

Please continue to study spelling and the math facts.

The students are working on contractions and verbs in grammar.

We would like to thank all parents for coming to conferences.

Mr. Pusateri

Mrs. Shay
