

## January & February 2011 Newsletter

A fire safety program, *Striking out with Matches* will be presented by Mrs. Theobald, a Muscatine fire fighter to the third grade classes.

It would be beneficial for your child to practice their math facts for addition, subtraction, and multiplication at home. It is important that each student master the basic facts, as we will be starting division in the next marking period.

The 100<sup>th</sup> day of school will be January 31<sup>st</sup>, pending snow days. Each class will be doing 100<sup>th</sup> day activities throughout the day.

In math we will be working on division facts from 0 through 9. We will be learning division rules for zero and one, relating multiplication and division through use of fact families. In Muskie Math we are continuing to work on multiplication.

In Social Studies we are working on Daily Geography. The students view and discuss map and globe skills.

Valentine parties will be celebrated on Friday, February 11 or Monday, February 14 pending a staff meeting. You will be informed of the exact date. Your child may bring Valentines for the entire class. Your child will have a list of student names.

Mr. Pusateri
