

November 2010 Newsletter

We have been working on the Measurement FOSS (Full Option Science System) kit for science. The students are involved in a variety of science hands-on metric measurement activities.

In math we are studying the calendar and telling time to the minute, quarter hour, half hour, and elapsed time. We will be creating line graphs, pictographs, bar graphs, line plots, and tally charts.

For our grammar lessons we have been studying common and proper nouns, singular nouns, plural nouns, and irregular plural nouns e.g. *man* becomes *men* as a plural.

Please ask your child if they are in need of any necessary school supplies (pencils, erasers, red marking pens, etc.). Some students are coming to school without the supplies (AR book, assignment book/ agenda). Students should take the responsibility to have these supplies in their backpack when they come to school.

It is important to sign your child's assignment book everyday and to make sure their homework is returned to school on time. Thank you for your help.

We appreciated the parental support of sending nutritious snacks during CogAt testing. Thank you also for sending the Halloween party supplies and goodies.

Mr. Pusateri
